

Description

Coupling piece for joining straight sections and accessories of Megaband® ladder by using M8 hexagonal nuts and bolts. Of 60 mm height, With INOX protection system, I316L finish. Suitable for Megaband® ladder of 60,100, 120 and 150mm height, maintaining electrical continuity, according to IEC 61537. Made of steel, available in different Protection Systems.

Advantages

Suitable for Megaband® ladder, heights 85, 100 and 120 mm.

Wide variety of sizes, protection systems and accessories to adapt to the requirements of each electrical installation.

Electrical continuity guaranteed according to standard IEC61537.

Very simple assembly by fixing the coupler to the Megaband® ladder by means of M8 hexagonal nuts and bolts.

Only necessary if straight sections are cut since the Megaband ladder has an integrated coupling system.

Applications

Suitable for the joining of straight sections and accessories of the Megaband ladder for the management of cables in electrical and telecommunication installations in public buildings, infrastructures and civil works, industrial installations, tertiary sector.

Solutions

Product data

ETIM 10	EC002413	u	50
Huella de CO2. GWP A1-A3 (kg CO2 eq.)	0,399	Material	Acero inoxidable AISI 316L
Protection System	INOX	Working temperature range (°C)	-50 / 150 °C
Finish	Stainless Steel AISI 316L	Fire resistance	A1 No combustible
Resistance Class	Class 9D		
Flange (mm)	60		
kg/u	0,075		

🔩 Protection System

CU - Copper electroplated

PG - Pregalvanised

EZ - Electrogalvanised

BC - Electrogalvanised Bichromate

BK8 - High Resistance Coating

GC - Hot Dip Galvanising

INOX - Stainless Steel

PT - Polyester Paint

AL - Aluminum

LN - Brass or Nickel-plated brass

🏠 Insulating materials

PC+ABS - Halogen Free Polycarbonate + ABS

PVC - Polyvinyl Chloride

PP - Halogen Free Polypropylene

PA6 - Halogen Free Polyamide 6

PA12 - Halogen Free Polyamide 12

PU - Polyurethane

PE - Polyethylene

NBR - NBR rubber

PET - Thermoplastic Polyester

TPV - Thermoplastic

Product applications
